 - (iii) If Collection Vehicles have more than one compartment and are carrying more than one Stream of Blue Box Material, selected Collection Vehicles will be directed to return to the weigh scale after emptying the first compartment to get a split weight (estimated 10% of Collection Vehicles by Eligible Community will be directed to split weigh). After split weighing, a Collection Vehicle will return to the tipping floor area for the second compartment and empty the contents of the Collection Vehicle. The Collection Vehicle will then return to the weigh scale to obtain a tare weight;
 - (iv) The Collection Vehicle must empty the fibre and container compartments on every trip to the RF. The Collection Vehicle operator must ensure each compartment is completely emptied before moving to the next tipping floor area and before leaving the property. The Collection Vehicle operator shall not clean out the Collection Vehicle in a manner that causes or may cause fibre materials to be commingled with containers or vice versa;
 - (v) If the Collection Vehicle experiences a bulkhead failure, the Collection Vehicle operator shall work with the tipping floor supervisor to separate the materials from each compartment;
 - (vi) Every Collection Vehicle must have a tare weight taken once every two months without exception. To alleviate the potential for backup and delays on the weigh scale, tare weight timing will be staggered; and
 - (vii) In the event an RF is unable to accept Blue Box Material from a Collection Vehicle, the Contractor shall immediately notify CMO and the Collection Vehicle shall proceed to another RF as directed by CMO. If the other RF is more than a sixty (60) minute drive from the centroid of an Eligible Community where the Blue Box Material was collected, CMO will reimburse the Contractor for reasonable expenses it incurs as a result of the Collection Vehicle's travelling beyond the sixty (60) minute boundary.

- (d) The Collection Vehicle operators shall comply with all operational protocol and procedures of an RF during unloading of Blue Box Material.

ARTICLE 4

EXHIBIT 9: COMPENSATION

- 1.1 For each calendar month during the SoW Term, the Contract Price for the Work performed under this Statement of Work in accordance with the requirements of the MSA shall be calculated as follows:
- (a) the Unit Price multiplied by the total number of Stops as provided for in Exhibit 2 at the start of the applicable calendar month (provided that the Unit Price shall be prorated for a Stop that did not receive Collection Services for the entire calendar month). For clarity, the number of Stops listed in Exhibit 2 shall be used in the calculation of the Contract Price even if the number of Stops listed in Exhibit 2 is not the actual number of Stops at the start of the applicable calendar month; plus
 - (b) for each New Eligible Source added during the applicable calendar month, the Unit Price per Stop prorated based on the number of Business Days during the calendar month after the effective date of the Change Order that added such New Eligible Source multiplied by the number of Stops for such New Eligible Source; less
 - (c) a charge for the Blue Box Material from Non-Eligible Sources, based on (1) the total tonnes of Blue Box Material collected in the applicable calendar month, according to records provided pursuant to the Work Report for the Month, divided by (2) the total number of Stops for Eligible Sources listed in Exhibit 2 plus the total number of Stops for Non-Eligible Sources listed in Exhibit 6 (both based on counts set out in the applicable exhibit at the start of the applicable calendar month), multiplied by (3) the total number of Stops for Non-Eligible Sources included in the count set out in Exhibit 6 at the start of the applicable calendar month plus any other Stops for Non-Eligible Sources that contributed to the total tonnes of Blue Box Material collected in the applicable calendar month, multiplied by (4) the Non-Eligible Source Blue Box Material Unit Price.

For the purposes of this Statement of Work, “Unit Price” means \$ ● per Stop per month [NTD: Set out applicable Unit Price.], as adjusted in accordance with this MSA, and “Non-Eligible Source Blue Box Material Unit Price” means \$ ● per tonne [NTD: Set out applicable price.], as adjusted in accordance with this MSA.

The Unit Price includes the Contractor’s administration factor as published by the Resource Productivity and Recovery Authority in its 2020 Datacall. Notwithstanding any other provision in the MSA, the Unit Price shall not be increased, and the Contractor shall not receive any additional compensation, if there is an increase in such administration factor.

1.2 Total Unit Price Adjustment

- (a) The Unit Price for each calendar month of the SoW Term shall be determined as follows:

Unit Price = Base Unit Price + Diesel Fuel Price Component Adjustment + Natural Gas Fuel Price Component Adjustment + Non-Fuel Price Component Adjustment, where such price adjustments are applicable to the calendar month.
- (b) The “Base Unit Price” is the Unit Price at the Statement of Work Eligible Community Service Commencement Date as set out in Section 1.1.

1.3 Total Non-Eligible Source Blue Box Material Unit Price Adjustment

- (a) The Non-Eligible Source Blue Box Material Unit Price for each calendar month of the SoW Term shall be determined as follows:

Non-Eligible Source Blue Box Material Unit Price = Base Non-Eligible Source Blue Box Material Unit Price + Diesel Fuel Price Component Adjustment + Natural Gas Fuel Price Component Adjustment + Non-Fuel Price Component Adjustment, where such price adjustments are applicable to the calendar month.

- (b) The “**Base Non-Eligible Source Blue Box Material Unit Price**” is the Non-Eligible Source Blue Box Material Unit Price at the Statement of Work Eligible Community Service Commencement Date as set out in Section 1.1.

1.4 Fuel Price Component Adjustment

- (a) The “**Fuel Price Component**” is 20% of the Base Unit Price or 20% of the Base Non-Eligible Source Blue Box Material Unit Price, as applicable.

- (b) Diesel Fuel

If the Contractor utilizes diesel fueled Collection Vehicles for the performance of Collection Services, for the first calendar month immediately following the Statement of Work Eligible Community Service Commencement Date and for each subsequent calendar month in which diesel fueled Collection Vehicles are used for the performance of the Work, then the “**Diesel Fuel Price Component Adjustment**” shall be (1) Fuel Price Component multiplied by (2) the percentage of fuel (measured by dollar expenditure) used in the Eligible Communities for the calendar month for the Collection Vehicles that is diesel, relative to all fuels used (i.e., diesel and compressed natural gas) for Collection Vehicles in the applicable calendar month multiplied by (3) the percent change in the Southern Ontario Diesel Price, as most recently published in the table of Fuel Prices located at <https://data.ontario.ca/dataset/fuels-price-survey-information> (“**Diesel Fuel Index**”), since the Statement of Work Eligible Community Service Commencement Date. The Diesel Fuel Price Component Adjustment will be added to or subtracted, as applicable, from the Base Unit Price or Base Non-Eligible Source Blue Box Material Unit Price, as applicable.

- (c) Natural Gas

If the Contractor utilizes compressed natural gas fueled Collection Vehicles for the performance of Collection Services, for the first calendar month immediately following the Statement of Work Eligible Community Service Commencement Date and for each subsequent calendar month in which natural gas fueled Collection Vehicles are used for the performance of the Work, then the “**Natural Gas Fuel Price Component Adjustment**” shall be (1) Fuel Price Component multiplied by (2) the percentage of fuel (measured by dollar expenditure) used in the Eligible Communities for the calendar month for the Collection Vehicles that is compressed natural gas, relative to all fuels used (i.e., diesel and compressed natural gas) for Collection Vehicles in the applicable calendar month multiplied by (3) the percent change in the Ontario Compressed Natural Gas Price, as most recently published in the table of Fuel Prices located at <https://data.ontario.ca/dataset/fuels-price-survey-information> (“**Natural Gas Index**”), since the Statement of Work Eligible Community Service Commencement Date. The Natural Gas Fuel Price Component Adjustment will be added to or subtracted, as applicable, from the Base Unit Price or Base Non-Eligible Source Blue Box Material Unit Price, as applicable.

1.5 Non-Fuel Price Component Adjustment

- (a) The “**Non-Fuel Price Component**” is 80% of the Base Unit Price or 80% of the Base Non-Eligible Source Blue Box Material Unit Price, as applicable.
- (b) For the first calendar month immediately following the first annual anniversary of the Statement of Work Eligible Community Service Commencement Date and for each subsequent annual anniversary, the “**Non-Fuel Price Component Adjustment**” shall be (1) the Non-Fuel Price Component multiplied by (2) the percentage change in the CPI Index, as most recently published, since the Statement of Work Eligible Community Service Commencement Date. The Non-Fuel Price Component Adjustment will be added to or subtracted, as applicable, from the Base Unit Price or Base Non-Eligible Source Blue Box Material Unit Price, as applicable, for such calendar month and for each of the subsequent eleven (11) calendar months.
